Professional Summary

Software Engineer with hands-on experience building scalable full-stack applications using the **MERN** ecosystem, **Next.js**, **Node.js**, **PostgreSQL**, and **AWS**. Experienced in developing **AI-powered applications** using **OpenAI**, **Amazon Bedrock**, **LangChain**, and **Retrieval-Augmented Generation (RAG)** with vector databases. Skilled in cloud deployment, Docker, CI/CD, Linux, and backend system design, with strong problem-solving abilities demonstrated through competitive programming.

Skills

Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Nuxt.js, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, GraphQL, REST APIs

Databases & Messaging: PostgreSQL, MongoDB, Redis, Kafka

Cloud & DevOps: AWS (EC2, S3, RDS, IAM, VPC, Bedrock), Google Cloud, Docker, Kubernetes, CI/CD, PM2, Linux, Git, Terraform, Ansible

AI & Tools: OpenAI API, LangChain, Prisma ORM, Meta Webhooks, Facebook Graph API, Instagram API, BullMQ

Work Experience

ReturnHex, Uttara

Oct 2025 - May 2026

Associate Software Engineer (Remote)

- Collaborated in a **2-member team** to build **v1 of a social media chatbot** integrating **OpenAI** with **Meta platforms (Facebook, Instagram)**, enabling automated customer messaging, order handling, and post comment replies.
- Implemented **image and voice message processing** and stabilized **Meta Webhook integrations**, resolving authentication and real-time event handling challenges for reliable message delivery.
- Optimized **prompt engineering and request pipelines**, reduced **OpenAI token usage by 30%** and improved response latency; introduced **Redis caching** and **rate limiting** to handle peak-hour traffic efficiently.
- Contributing to **v2 development** by implementing **message queuing with BullMQ**, improving system reliability and throughput, while managing **server operations** (deployment, staging, debugging) using **CI/CD pipelines**, **Docker**, **PM2**, and applying **DevOps fundamentals** for scalability and stability.
- Built and deployed cloud-based backend services using AWS EC2, S3, RDS, IAM, and VPC while integrating Amazon Bedrock for AI-powered features and managing deployment pipelines with Docker and CI/CD.

April 2025 - Oct 2025

Software Developer Intern (Remote)

- Rebuilt and deployed an **Education Management System**, resolving **deployment and codebase issues** while gaining hands-on experience with Next.js (SSR, CSR, SSG), Node.js, Express.js, MongoDB, NestJS, and PostgreSQL.
- Collaborated on a travel agency portfolio using Nuxt.js (Vue.js), developing responsive, interactive user interfaces with **animations** while improving performance and **SEO**.
- Developed an **MVP** social media automation system with **OpenAI**-powered Facebook Page **DM and comment reply automation**, gaining practical experience in **AI integration** and backend development.

Education

City University, Ashuliya, Dhaka

July 2022 – July 2026

Bachelor of Science (B.Sc.) in Computer Science and Engineering

CGPA: 3.46/4.00

Relevant Coursework: Object Oriented Programming, Advanced Enterprise Java, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, AI/ML

Project Work

- **AutoPingAi - Social Media Automation Platform (2025):** Built a chatbot integrating OpenAI with Meta platforms.
[Live Demo](#)
- **BashaAi- Ai Integrated Room Finder Platform (2026):** Built an AI-powered room finder platform using Next.js, Node.js, PostgreSQL (Neon), Prisma ORM, OpenAI, Amazon Bedrock, OpenStreetMap, and shadcn/ui. Implemented AI-assisted property search, messaging, and scalable cloud deployment on AWS.
[Live Demo](#) | [GitHub: Client](#) | [GitHub: Server](#)
- **LibraryOS: AI-Powered Library Management System (2026):** Built a comprehensive library management platform with AI-driven catalog search using Next.js, NestJS (Node.js), PostgreSQL (Neon), Prisma ORM, OpenAI, and PostgreSQL (pgvector). Implemented intelligent document retrieval, multi-tenant role-based access, and scalable cloud deployment.
[Live Demo](#) | [GitHub: Client](#) | [GitHub: Server](#) | **Credentials:** demo@libraryos.demo / demo123
- **Portfolio Management(2025):** Built a portfolio management platform with profile and section management using React.js, Node.js (modular OOP architecture), JWT authentication, and Cloudinary.
[Live Demo](#) | [GitHub: Client](#) | [GitHub: Server](#) | **Credentials:** biswassnaeemcse@gmail.com / 123456

Cloud & Infrastructure Experience

- Deployed and maintained production and staging full-stack applications on AWS and Google Cloud Platform (Compute Engine), leveraging EC2, RDS (PostgreSQL), S3, IAM, VPC, and GCP Firewall Rules to build secure and scalable cloud infrastructure.
- Integrated Amazon Bedrock to develop AI-powered application features and automated deployments using Docker, PM2, and CI/CD pipelines.
- Worked with Kubernetes (Minikube), Terraform, and Ansible for container orchestration, infrastructure provisioning, and configuration management.
- Administered Linux servers and utilized Prometheus and Grafana for monitoring, debugging, performance optimization, and system maintenance.

Awards and Certificates

- Software Developer Intern Internship Completion Certificate at ReturnHex - [RH Internship Certificate](#)
- Mastering DevOps Course– Ostad - [Certificate](#)
- Participated at ICPC Asia Dhaka Regional Onsite Contest - [ICPC-2025 Participation Certificate](#)
- Winner, Intra-Department Code Clash Programming Contest - [Code Clash Winning Certificate](#)
- Pupil rank holder at CodeForces - [CF Profile](#)
